

BRADDOCK TUTORING

2026 – 2027

Our detailed tutoring schedule for Weeks 2–10 will be ready on Monday of Week 2. Check back then to see when free drop-in help is available for specific courses. No appointment is needed. The schedule will also be posted at the entrance to our center in Lillis 240.

Frequently Asked Questions

- [Why can't I see the detailed tutoring schedule even after Monday of Week 2?](#)

Your browser may still be displaying this previously posted informational PDF from its cache. Try clearing your browser cache and then opening the PDF schedule again. If the issue persists, try accessing the schedule using a different browser.

- [How does it work if I need course help at Braddock Tutoring?](#)

When the schedule shows that tutoring is available for the course you need help with, sign in at the front desk when you arrive. Our staff will direct you to the appropriate tutoring area.

You are welcome to study in our center and ask the tutor questions as you work.

If you arrive with specific questions, our front desk staff can connect you directly with a tutor. After receiving help, you may continue studying and working on your coursework in the center as long as tutoring is scheduled for your course.

- [I have a lot of homework to do and notes to review. How long can I stay and study in Braddock?](#)

You are welcome to study in our center as long as tutoring is available for the course you are working on. To support your well-being and learning, we may occasionally encourage students who have been studying for many hours to take a break outside the center and return later. For example, if we notice that you appear fatigued or are spending more time on your phone or socializing than studying, a break may help you recharge and refocus.

Both your instructors and our staff encourage consistent study habits rather than last-minute cramming.

- [My tutors before coming to UO helped me complete my homework so I would receive full credit. Can Braddock tutors help me in the same way?](#)

Braddock tutors cannot provide answers or complete assignments for students. Instead, they help students understand concepts, apply problem-solving strategies, and work through examples so they can complete their own assignments successfully.

We want to support your learning and help you develop the knowledge and skills needed to succeed in your courses.

- [Will a tutor always be available during the times listed on the detailed tutoring schedule?](#)

We make every effort to ensure that tutors are available during all scheduled tutoring hours. However, unexpected situations such as illness or emergencies may occasionally prevent a tutor from working a scheduled shift.

If this happens, our front desk staff will try to connect you with another tutor. If no substitute tutor is available, we will let you know when the next tutor for your course will be available.
